## OBJECTIVE

---

Frontend-focused Web Developer with practical experience building and deploying responsive, component-based applications using React.js, JavaScript (ES6+), and Tailwind CSS, along with working knowledge of backend development using Node.js, Express.js, MongoDB, and authentication/authorization with JWT and Bcrypt. Seeking an internship or entry-level opportunity in Frontend, Backend, or Full Stack Development to apply strong fundamentals in building user interfaces and RESTful applications, while continuing to grow through real-world, team-based projects.

## TECHNICAL SKILLS

---

**Languages:** HTML5, CSS3, JavaScript (ES6+), C++

**Frontend:** React.js, React Hooks, Tailwind CSS, Responsive Web Design, REST API Integration

**Backend:** Node.js, Express.js, JSON Web Token (JWT), Bcrypt, Authentication & Authorization

**Databases:** MongoDB, MySQL

**Tools & Platforms:** Git, GitHub, VS Code, npm, Vercel, Netlify

**Core Concepts:** Component-Based Architecture, State Management, CRUD Operations, Version Control, Deployment

## PROJECTS

---

### Portfolio Website

*React.js, JavaScript (ES6+), HTML5, CSS3* | [Link](#)

- Built and deployed a personal portfolio website in React.js to present projects, technical skills, and contact details to recruiters and collaborators.
- Designed reusable, modular components and implemented smooth scrolling and interactive animations to improve navigation and engagement.
- Structured the layout with a mobile-first approach, ensuring consistent rendering across desktop, tablet, and mobile breakpoints.

### Todo Application

*React.js, JavaScript (ES6+), HTML5, CSS3, Local Storage* | [Link](#)

- Developed a task-management application in React.js with full Create, Read, Update, and Delete (CRUD) functionality.
- Implemented Local Storage integration so tasks persist across page refreshes and browser sessions without a backend dependency.
- Built the UI using functional components and React Hooks (useState, useEffect) to manage task state efficiently.

### Movie Search App

*React.js, JavaScript (ES6+), HTML5, CSS3, REST API* | [Link](#)

- Built a movie search application that consumes the OMDb REST API to fetch and display real-time movie data.
- Implemented dynamic, debounced search along with conditional rendering of posters, ratings, genres, release dates, and plot summaries.
- Handled asynchronous API calls with loading and error states to keep the interface responsive during data fetches.

## EDUCATION

---

**Bachelor of Computer Applications (BCA)** — 2023 – 2026

Indira Gandhi National Open University (IGNOU)

Final semester in progress

**Senior Secondary (Class XII), CBSE Board** — 2021

Government Sarvodaya Bal Vidyalaya

Percentage: 74%

**Secondary (Class X), CBSE Board** — 2019

Government Sarvodaya Bal Vidyalaya

Percentage: 79%
